

AIRSEC 3000

**The compact and
powerful air dehumidifier**

**(Especially suited for
the indoor drying of clothes)**

AIRSEC 3000

The air dehumidifier for healthy, pleasant room air and effective protection against mildew and rot.

Economical, fully-automatic operation:

AIRSEC air dehumidifiers regulate air humidity fully automatically thanks to their built-in hygrostat. Alternatively, the units can be set to operate continuously. An overflow cut-out switch turns off the dehumidifier automatically once the water container is full.

The high air throughput capacity of the AIRSEC 3000 ensures both rapid and thorough dehumidification. A moveable flap permits the outgoing air stream to be directed as desired.

■ The AIRSEC 3000 also keeps poorly ventilated bathrooms permanently dry. Drying time is decreased for smaller wash loads and hand-washed items. The adjustable air flap can be used to direct the air stream.

■ Whether for a hobby room, storage room or living area, the discreet, elegant design will complement every décor. Its silent operation also makes it ideal for living rooms and bedrooms.

■ When used in cellars, garages, work-rooms etc., the AIRSEC 3000 automatically ensures that the correct climate is maintained and stored items suffer no damage.

The main specifications

Voltage	volts/Hz	AC 230/50
Amps	A	1.3
Fuses	A/T	6
Power consumption at 20°C	watts	250
Container capacity	litres	6.5
Dimensions: height/width/depth	cm	61/39/27
Weight	kg	18
Decibels 5/2 m	dB(A)	42 / 45
Temperature range	°C	12-30
Air Volume	m ³ /h	160
Cooling capacity +7.2°C / +54.5°C	watts	570
Refrigerant		R-134 a
Operative range max.	m ³	200
Water removal (DIN EN 810)		
27°C / 60% rel. humidity	l/24 h	11.3
30°C / 80% rel. humidity	l/24 h	17.5

Key features at a glance:

- High dehumidification capacity at low power consumption
- Fully automatic, maintenance-free operation
- A consistent level of air humidity - permanently
- No more moisture damage
- Simple operation
- Overflow cut-out switch
- Sturdy, hard-wearing plastic housing
- Moveable, thanks to 4 swivelling castors and a folding handle.
