

Why AQUA ANSTAN electronic scale prevention units?

Only AQUA **ANSTAN** supplies a full unique system which has a capability not equaled by competitors.

The heart of the AQUA **ANSTAN** is an alternating digital pulse constantly ranging across a 20 kHz frequency and varying in strength.

AQUA **ANSTAN** can be used in any application where scale fouling occurs. Besides the prevention of scale formation, existing scale is also removed.

AQUA **ANSTAN** is effective against any form of scaling problem, and will prevent scale build up and/or remove existing scale.

AQUA **ANSTAN** design life is twenty years which is being exceeded in existing applications.

AQUA **ANSTAN** is an easy retrofit as installation of the units is non-intrusive.

No maintenance required on the AQUA **ANSTAN**

AQUA **ANSTAN** a very successful product which offers a full money back guarantee
